

**SOLID BOWL CENTRIFUGE**

**Comprehensive  
maintenance  
plan**

# About

To keep your centrifuge or decanter at its full operating capacity, it's crucial to ensure you follow a detailed maintenance plan. By allowing Vanadium to create a customised maintenance plan for your machine, we can eliminate inefficiencies and minimise downtime.

## **The Vanadium's Maintenance Advantage provides you with:**

- A Comprehensive Report outlining any operating issues, and recommendations to assist in the efficient operation of your machine.
- All machines are inspected by our Senior Service Engineer with over 30 years of experience
- We aim to improve your machine's performance and can reduce the repair cost on parts and servicing.
- Reduce unplanned stoppages & minimise the risk of the process failing and costing you money.

**Eliminate  
inefficiencies**

## Expert analysis & tailored quotations

to ensure you have the right piece of kit for your application.

## Streamlining installation

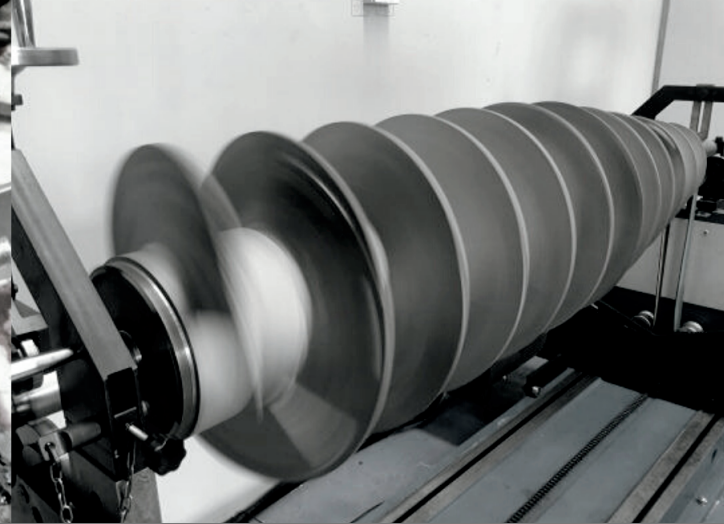

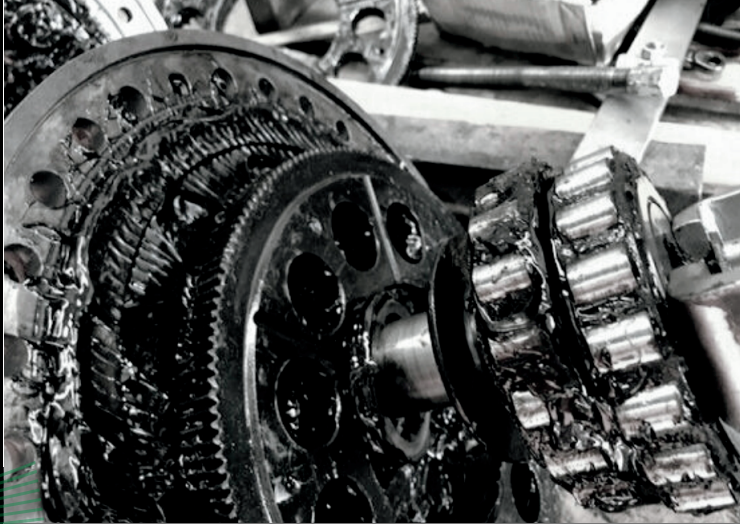

Installation and commissioning of your decanter or centrifuge can be a difficult and costly but the team at Vanadium understand the importance of getting it right, so rest assured that experienced engineers install your machine with speed and efficiency as a priority.

## Commissioning

Our qualified service engineers manage all critical issues with commissioning and start up of your new machinery and ensure that both the equipment and the process operate according to your expectations.

## Training

We also provide on-site training for your team, on how to operate your machinery & processes efficiently. As part of our commissioning process, we will also complete test runs and follow ups.

# KEEP YOUR CENTRIFUGE OR DECANTER AT ITS FULL OPERATING CAPACITY

## REPAIRS

Repairs and replacement of parts for centrifuges and decanters can become a costly experience.

At Vanadium our priority is to help you keep your equipment in top operating condition while reducing overall operating costs. We repair, upgrade and optimize the output of your decanters or centrifuge to satisfy your requirements and specifications.

Once repairs are complete, Vanadium can create a maintenance plan for your machinery, ensuring peak performance and minimizing the risk of unscheduled production downtime.

## Why use Vanadium?

- + Experienced
- + Professional
- + Comprehensive
- + Detailed
